Thread: [What is The Best 7200 Seconds Booter With 1 Week Memberships?](#)

JamesHen - January 12, 2015, 6:07 pm

I bought some booters won't name any names but they could barely knock home connections offline
I need something with 7200 seconds for stress testing (I have permission of course)

Chance The Rapper™ - January 12, 2015, 6:44 pm

Check out the HF stress testing section in the marketplace
Im sure you can find what youre looking for there ?

Yeah I looked there, got vDos and 90% of the time it's not powerful enough to stress test small servers.

Alpis - January 15, 2015, 1:13 am

Don't buy vDos for homeconnections lol. I think they are more made to hit off servers/websites than HC's

BlackWatchDemon - January 15, 2015, 4:11 am

I use titaniumstresser.net for home connections works greats and has allot of features

BlackWatchDemon - January 15, 2015, 4:12 am

I use titaniumstresser.net and it takes home connection down in a heart beat also has great features

I didn't buy it for home connections.

I bought it for small servers/websites. and it doesn't hit hard at all.

i can hit with a bootnet :p pm me and il give my skype you can pm me at anytime or i can recommend inboot.me or xyz ?

Habitual. - January 15, 2015, 12:00 pm

I recommend inboot.me too, it's a hard hitting booter with good support and reasonable pricing.

Alpis - *January 21, 2015, 5:39 pm*

I prefer powerstresser! Best stresser in the market! I also heard uniquelayer is hitting 50-100 gbps per attack! can you believe it ^^ bypasses ovh VAC i heard too.
