Thread: [Where to post xbox one game codes?](#)

Purps - January 13, 2015, 1:03 am

So I bought 2 Assassin creed bundle Xbox Ones and have the codes left from one of them. I tried posting in premium sellers section, but apparently that's not the right place.

So now there is this confusion of why was my thread deleted and where do I post it now.

I think if someone is trying to do legit business in the marketplace but has a small technical error such as posting in the wrong forum, then the mod should either move the thread to the correct forum or message the person to let them know why it was removed to prevent it from happening in the future.

A little knowledge can go a long way just by people spreading the word. Especially in a community like hackforums where basically everything is talked about either in private or in threads.

Where would that thread belong?

Edit: I spent a decent amount of time on the thread and it's pretty damn annoying to have to do it again when I work 40+ hours per week and don't have time to be retyping sales threads and playing guessing games on where the thread belongs. /rant

I agree, the mods need to step up on explanations. That said, xbox-related items are not allowed to be sold here

We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.

Alright. I have no issue respecting that rule. The heads up is very much appreciated.

Next time OP, read/understand the [Help Docs](#) before you post to make sure it is not disallowed.

As mentioned above, the rule you broke is located here:

<https://hackforums.net/misc.php?action=help&hid=21>

[url=//hackforums.net/misc.php?action=help Wrote:Help Docs[url]]Xbox Products

Due to the heavy amount of fraudulent deals around MS Xbox products such as the xbox one, games, xbox live points and MS points. We do not allow any sales, trades, or marketplace activity based on these products. No exceptions.

No MS Xbox One related (gaming) codes. Sorry OP.
