Anyone else watched Barakamon? I saw it a few months ago and I've been trying to get more people who are interested in slice of life animes to give it a go. Talking about these sort of animes, I liked it more than Silver Spoon. The story is simple, yet compelling. The characters are also amazing and grow along with the story.

There are only 12 episodes, but its definitely a show worth watching in my opinion.

I've heard of it but never watched it, might give it a go now. What would you rate it if you had to 1-10?

I remember watching one episode and then completetly forgetting about it. Might watch this time around.

Definitely an 8. Not that it matters a lot, but I really like the animation style too. And its a short but sweet anime. I'd definitely suggest giving it a go.

One of the few slices of life that isn't based around a school, I enjoyed it.
