Thread: [Any website that decrypt more than 64x md5 hashes?](#)

Beznadzieja - January 13, 2015, 6:47 am

Hey, im searching for any website that decrypt more than 64x md5 hashes.
Anyone? Anything? Thanks for helping me out :) ? ? ?

MegaSkid1337 - January 13, 2015, 6:51 am

Google for md5cracker. It uses multiple sources for "cracked" hashes.

munachim - January 13, 2015, 8:33 am

yes bro go for md5cracker it will help you ithink

Forezza - January 13, 2015, 1:08 pm

Just split it up into lists and do 64 at a time on hashkiller.co.uk. Or just download oclHashcat and crack them with your GPU.

hashkiller is shit, use Hashes.org.

Why is it shit?

Amount of hashes

Hashes.org: 399,184,057 (All algorithms)

Hashkiller: 47,745,000,000

The outputs are not much different and they both use community support to crack uncracked hashes.

As many as hashkiller says to have, a lot of them are junk from what i can tell. Several of the hashes i have gotten back from hashes.org, i haven't get back from hashkiller. Hashes.org tosses junk hashes making their db smaller but more refined IMO.

@OP, you could always contact someone from here to do it for you. I'm locked up for the next day or so on an attack but im sure someone is free.

And yet Hashes have a much better success rate...

Only real passwords are used in Hashes.org. Also chick3nman, the junk file is included in the database.

It's separated when downloading at least.
