Thread: [Question about moving a themed borderless form](#)

DigiDeveloper - January 13, 2015, 8:30 am

Hello, Thanks for checking out the thread , and hopefully someone can point me in the right direction....

Ok I have a form that I need to drag and the form im using i have themed.... so i try using the following code with no success.....

```
Code Dim drag As Boolean
    Dim mousex As Integer
    Dim mousey As Integer
```

```
Private Sub PositronTheme2_MouseDown(ByVal sender As Object, ByVal e As
System.Windows.Forms.MouseEventArgs) Handles Me.MouseDown
    drag = True
    mousex = Windows.Forms.Cursor.Position.X - Me.Left
    mousey = Windows.Forms.Cursor.Position.Y - Me.Top
End Sub
Private Sub PositronTheme2_MouseMove(ByVal sender As Object, ByVal e As
System.Windows.Forms.MouseEventArgs) Handles Me.MouseMove
    If drag Then
        Me.Top = Windows.Forms.Cursor.Position.Y - mousey
        Me.Left = Windows.Forms.Cursor.Position.X - mousex
    End If
End Sub
```

I've just tested it on Positron theme, it moves fine. But to answer your question:

```
Declare the following:
Code Private cX, cY As Integer
Private Dragging As Boolean = False
MouseDown event:
Code Dragging = True
cX = e.X
cY = e.Y
MouseMove event:
Code If Dragging Then
    Me.Top = Me.Top + (e.Y - cY)
    Me.Left = Me.Left + (e.X - cX)
End If
MouseUp event:
Code Dragging = False
```

You'll want to make changes directly to the PositronTheme class. Otherwise you'll be using repetitive code over all of your themed forms.

I've coded up a simple form skin for you. Take these concepts and apply them to Pat Positron's theme.

<http://pastebin.com/BYbeSvQ3>

Enjoy. ?
