Thread: [LawllyHax CSGO || ESP + Triggerbot || Limited Sales || 1+ Year Undetected!](#)

**\$uicidal** - January 14, 2015, 5:39 am

Completely external ESP and TriggerBot, you can use this cheat while livestreaming or recording CSGO and it won't be visible.

## Current Features

//Aimbot (Automatically aims at enemies) Removed for fixes  
ESP (Draws red boxes around enemies)  
TriggerBot (Automatically shoots at enemies)  
Crosshair (Always visible, even with awp / scout)  
RapidFire (Works best with pistols, especially tec9, just autoshoots when you hold down a key)  
Recoil Control (Will pull your mouse down slightly to control recoil)  
Trigger+RCS (TriggerBot + Recoil Control, it'll automatically pull down when you aim at an enemy)  
Team ESP (Will draw blue boxes and snaplines on your team)  
Team Trigger (Will shoot at your team)  
SnapLines (Lines that come out from the bottom of your screen to the enemy's feet)  
HeadLines (Line's that'll come out from your crosshair and lead to an enemy's head)  
HeadBoxes (Draws boxes around enemy's head)  
Tracers (Draws a line from the enemy's head to where they're aiming)  
Bone ESP (Draws where each bone is \*Still Under Construction!\*)  
Bunnyhop (Automatically jumps, like a bunny :3)  
Recoil Prediction (Draws a little red crosshair where your recoil is predicted to be)

Awesome to see you have limited spots, it shows that you care mate!

**\$uicidal** - January 15, 2015, 7:38 am

Now offering VIP spots.

Only 5 available.

This cheat is on limited sales specifically to lower attention towards it.

I plan on keeping this cheat undetected forever, may sound like I'm being cocky, but it can surely be done.

If you're looking for a cheat to livestream / play on your main account, I'm very confident this cheat will not get your account VAC banned in the near future.

This cheat is an on going project for me, and I'm learning a lot in my process of developing it.

Features are added very often, and I'm testing new features every day.

External Visibility Checks have already been added.

I hope to have an aimbot setup in at least a few weeks, complete with visibility checks, hitboxes, distance / field of view checks and recoil control that works for all weapons.

Looking at his profile it shows he was banned by overwatch, not VAC. Anyone using this cheat just has to not be obvious to the players around them to avoid these kinds of bans.
