Thread: [FREE RAT SPREADING GUIDE! +3 METHODS EVERY DAY!](#)

**Loyalty.** - January 14, 2015, 10:01 am

Hello all!

This is going to be my first proper in depth tutorial, but if you need more methods or have a problem PM me or add me on Skype! These spreading techniques are mainly for RATS but can be used for other viruses as well!

## Method 1:

YouTube spreading is a highly used but still effective method of spreading your RAT/virus. When using a method you have to think what you want out of it. If you want someone with a FIFA 15 account, lets say, make a video titled "FIFA 15 COIN GENERATOR." And post it. Use a lot of tags in the tag section and in the description to attract more viewers. I personally used this method with a "STEAM AND CS:GO AUTO-BUYER 2015" which you can see the results of here:

<http://prntscr.com/5sfg9r>

I'd use this method if you're looking for slaves particularly from a gaming background.

Time: 20 minutes Slaves: 50-250 a week Effectiveness: 8.5/10

## Method 2:

E-Whore spreading is a great way to get a lot of slaves very fast in a very small amount of time.

Use sites such as <http://www.chat-avenue.com/adultchat.html>, [www.adultchat.net](http://www.adultchat.net) and <http://www.chat-avenue.com/teenchat.html>.

To use this method simply enter a username such as "naughty.girl.69" and post in the main chat "Looking for private fun. Have pics willing to trade x." This may seem weird at first, but it is a great way to get slaves. To do this you'll have to change your stub's icon by using a free icon changer you'll be able to find on Hack Forums or you can just search Google. Put on an icon of a sexy image (I'll have some at the end of this thread) and wait to be PM'd on the chat-rooms. Once you start getting PM's you have about 100-400 a minute. Copy a sentence such as "Hey babe, I have pics here your link x x x" and paste it in every PM you get. You can also post it on the main chat of the chat-room. This method can be done very quickly and effectively. Results: <http://prntscr.com/5sfkpc>

Time: 5 minutes Slaves: 100-300 a week Effectiveness: 9.3/10

## Method 3:

Minecraft spreading is a very effective method of gaining lots of slaves easily and without a lot of work. Head over to Minecraft Forums such as <http://www.minecraftforum.net/> and <http://www.planetminecraft.com/forums/>. You'll need to be slightly trusted in the community, so go around trying to get 70+ posts before creating this thread. You'll want to make a thread and call it "New Minecraft Texture Pack v1.0" or "Minecraft Skyrim Mod v69.1". You'll have to spoof the extension to .jar to make it look like a legit Minecraft add-on and if you can you should also try make an error come up, such as ""MC.TP.69 has .NET dependencies, it is unable to start on your system, do not contact the owner about this, but re-install the Microsoft .NET Framework and other programs." This should bring in a good amount of slaves per week!

REMEMBER : Minecraft forum users will be quite young, so remember that when doing this method.

Time: 1 hour Slaves: 50-150 a week Effectiveness: 8/10

Thanks for reading! If this did help you out, please leave a post down below to show your appreciation. Tomorrow I'll post another 3 methods so keep an eye out for that! Thanks again for reading!

**Zaberess** - January 14, 2015, 10:42 am

Thanks man, helped alot, cant wait for more :D

**Loyalty.** - January 14, 2015, 11:19 am

(Jan 14, 2015 11:42 AM)Zaberess Wrote: [\[CITE\]](#) Thanks man, helped alot, cant wait for more :D  
No problem, thanks for the reply! Another 3 methods up tomorrow!

**Sanglad** - January 14, 2015, 11:35 am

Nice methods man, I will maybe try one.  
And thanks for the FREE share.

**Loyalty.** - January 14, 2015, 11:45 am

where have you upload your server? I use ge.tt but upload directly the server . exe is not Allowed.  
In your screeshot it seems like it's ge.tt

**Loyalty.** - January 15, 2015, 8:45 am

they saying that i broke the rules when i upload .exe, i think is the name, i don't why but it's working when i put another name.  
thanks

**adeadrabbitt** - January 15, 2015, 11:38 am

I have to admit, the minecraft one i have not heard of. Thanks

**thesaints91** - January 15, 2015, 3:44 pm

does anybody have any good tips - ive extension spoofed my rat to a jpeg which is fine when viewing it in windows explorer, but uploading to ge.tt etc it always shows as downloading an exe. my browser even flags up a message saying this is an exe are you sure?

any tips?

**Bucky** - January 15, 2015, 4:24 pm

I can vouch for the YouTube method. I have tried it out and it works flawlessly. I will be trying the ewhoreing method soon!

**Loyalty.** - January 17, 2015, 5:59 am

thanks

your server probably isnt crypted, once they detect the virus, your .exe will get removed and you will be suspended i think.

**Winocm** - January 17, 2015, 6:46 am

Nice job, helped me in some way and thanks ;)

**CybexAlpha** - January 17, 2015, 8:24 am

thx man for the sharing will help a lot

**silence086** - January 17, 2015, 1:01 pm

What's a good upload site to use for the e-whoring method? I know most of those sites block pasting full URLs so you have to use spaces and whatnot which can be a pain for long URLS

**Loyalty.** - February 8, 2015, 11:35 am

(Jan 17, 2015 07:46 AM)Winocm Wrote: [\[CITE\]](#) Nice job, helped me in some way and thanks ;)

I personally use ge.tt but I'm sure you'll probably find a better one!

**cango2887** - February 8, 2015, 11:50 am

thanks men other user sale this for 15 \$ fine men good luck ,)

**GewooE** - February 8, 2015, 12:51 pm

Wow this thread helped me out a lot thanks mate!  
I can't wait for the other methods.

**waqob** - February 8, 2015, 1:58 pm

But Minecraft mods aren't supposed to be opened. So I don't know how the Minecraft method will work

**TacoTejano** - February 8, 2015, 2:06 pm

I have not done anything with youtube spreading but I got an idea for it. Once I get situated then I will try and get my spreads this way.

So far I just use USBs and just pass them out to folks or just jack in or just leave USBs around for Vicks to pick them up.

**Loyalty.** - February 16, 2015, 10:00 am

Yeah another good spreading method is with USB's which is pretty self explanatory.

PM anyone who needs help with anything.

**C=APHP?C=HA** - February 17, 2015, 9:51 pm

Is ewhore method really that effective? I remember messing on chatroom years ago, pervs weren't that stupid to download .exe files or click on fishy links. Maybe they got hornier in 2015? I'd like to know more about the success of it and how to bait them exactly. I think my problem is that I make it too complicated.

**Loyalty.** - February 26, 2015, 10:02 am

Sorry guys, been really busy IRL, I'll try to update the thread soon!

**maxtan** - February 26, 2015, 11:33 am

Thanks man, helped alot  
I can't wait for the other methods.

**Loyalty.** - March 28, 2015, 5:13 am

Another method! Sorry I haven't kept this thread alive but I'll try to update it more over the next few days.

Method 4:

MPGH "Hack" Spreading is also another great method of decieving someone into you ratting them. You do not need to have a well-respected and thanked account but it will definitely pull in a lot more slaves than just joining up and posting it straight away. If you cannot buy a MPGH account you can try to become respected with helpful posts and hacks. When you're respected enough, check what the most popular game hacks are at the time. I personally used Reign of Kings as it has a large player-base and a lot of people are looking to get hacks on it. I posted a thread named "Reign of Kings Public ESP Godmode and Teleport" or along those lines. I got 22 slaves that day just from that one method and it is very effective. You do not have to use MPGH either, you can use any time of hack forum, and people are probably more gullible on Unknown Cheats.

I will add another method every few days, please reply to the thread if these methods worked for you.

Time: 5 minutes or 1 hour (depends on if you already have an account). // Slaves : 20 per day. //

Effectiveness : 9/10

**Vuln** - March 28, 2015, 5:26 am

(Feb 16, 2015 11:00 AM)BadgerOnViagra Wrote: [\[CITE\]](#) Yeah another good spreading method is with USB's which is pretty self explanatory.

Classic USB spreading is completely dead. It's been patched ages ago.

There are modified (usually U3) drives or even [custom-built](#) ones available, but those are not going to be cheap.

**Azraelstear** - March 28, 2015, 5:33 am

Working method, even if I consider ~100 slaves/week pathetic.

But these are methods easily any noob is capable to do. So they are good, even if not that effective.

**Loyalty.** - March 28, 2015, 6:32 am

(Mar 28, 2015 05:33 AM)Azraelstear Wrote: [\[CITE\]](#) Working method, even if I consider ~100 slaves/week pathetic.

I just wanted to make methods that everyone could use not just a few specific people. If you have any you think would be good to add PM me and we can talk.

**coldxice** - March 28, 2015, 7:05 am

so e.g after i got the .exe out of darkcomet i just can spread it and when the victim clicks on it they appear on my RAT? (sry i am a noob :D )

**alphamodz** - March 28, 2015, 7:08 am

thank you for your method you have a good hoster for file ?

**Loyalty.** - March 28, 2015, 7:41 am

(Mar 28, 2015 07:05 AM)coldxice Wrote: [\[CITE\]](#) so e.g after i got the .exe out of darkcomet i just can spread it and when the victim clicks on it they appear on my RAT? (sry i am a noob :D )

Yes you can. Hope this helped you out.

This method will require downloads but I have a trusted source here on HackForums, please do NOT download this program from anywhere else as you may be at risk of infection.

Method 5:

Worm spreading can be a highly effective and easy auto-pilot method of getting slaves fast. It requires hardly any work and you can leave it to collect slaves even when you're not on your computer.

First of you'll have to get a worm. I have a link to a very good Worm known as Monster Worm, which is somewhat outdated but still can be effective. If you want to make sure you're Worm doesn't get detected you may have to purchase a newer one or check if there are any free recent worms. Input your settings into the worm, you'll have to make sure you have a download link for your stub so the worm can easily download it and send it.

The best settings for Monster Worm are as follows:

Startup:

Install file -- Temp/AppData  
Startup Persistent  
Local Machine/Run  
Persistent installation

Spreaders: (here you'll input the message the victim will send to all recipients of the stub)  
Check all so the worm can be as effective as possible.

Message:

This message will be sent to your victim as a fake message once the stub has ran. You do not particularly need this, however it is optional.

Disable:

Run command line

Regedit

Msconfig

Task Manager

Firewall

(you'll need all of these ticked)

Disable Antivirus:

Disable all so you don't get detected.

Anti's:

All checked.

Extras:

Hide in Task Manager

Remember, settings may be different on different worms, so always check before following this guide.

Monster Worm link ----- <https://hackforums.net/showthread.php?tid=3666841>

PM me if I have missed something/got something wrong, I'm still learning about Worms myself.

Time: 10 minutes // Slaves: Depends. Can be thousands. // Effectiveness 9.5.

**Slavoj Žižek** - April 11, 2015, 3:35 am

This is pretty fucking awesome i was gettin round 300 ish downloads a week but with the e-whoring method im gettin round 800 thanks bruh!

**ajeeb** - April 11, 2015, 5:23 pm

thank you for sharing SPREADING GUIDE

i like alot

**Loyalty** - April 12, 2015, 5:32 am

No problem, use it as much as you can!

**MrHoTsHoTzZ** - April 12, 2015, 6:04 am

The youtube method is highly effective i have 249 slaves (and counting) dont know what to do with them might start giving them away XD

**Ghost420** - April 12, 2015, 6:23 am

im trying method 2 atm, still 0 slaves :/

**Hexalogy** - April 12, 2015, 6:31 am

I known about all these methods I can say by far the minecraft method is the most effective way to spread you bot/R.A.T

**Sahaj** - April 12, 2015, 6:32 am

Great methods, really helpful. Thanks for sharing.

**jhoncarbnt** - April 12, 2015, 6:42 am

thanks alot man its very useful .....

**coldxice** - April 12, 2015, 3:50 pm

Hey jacko i wrote u a message on skype pls check :))

**LeetSpeed** - May 30, 2020, 5:48 pm

Thanks for posting these methods very useful information

**BRAJA.BOXY** - May 30, 2020, 8:53 pm

will try this and see  
how many i get  
thanks

**xScarface** - May 30, 2020, 11:24 pm

Thanks man def will be using 1 of these guides

Be safe

**TheBrokenWasp** - May 31, 2020, 8:44 am

Just to let all of you people know, this thread is 5 years old. You're gravedigging.
