Thread: [Any rat spreading guides to cs go users?](#)

odedor444 - January 15, 2015, 9:05 am

if anyone can tell me a way to spread it fast to cs go users

i will appriciate this...

thanks in advance

or if someone can spread this for me to cs go users

No one is going to spread for you :P

You could upload a video to YouTube showing a hack or a glitch, and upload your file as that hack.

No one is going to spread it for you though.

You can look at my thread if you want help! It has a great way to pull in CS:GO slaves specifically!

all my victims are gamers they all have Bf3 because i spread to BF3 players

1-get a cs go hack

2-record while using the hack

3-post on youtube and put your link in the description

4-you will get to receive clients but slowly because u will get to need traffic

i would like to add something here. You can make a account on a gamers forum where they play mostly CS:GO ofc. this can be a cheaters forum or selling forums.

for cheaters forums make a video, upload to YT and share links on the forums. be creative :D

Yeah but in most forums no one would download something from a new member and he would get banned once someone detect it maybe if he binded it it would work

If you want to target a certain group make something that appeals to them. In this case CS:GO players love hacks so make a YouTube video of some "free" hacks and boom!

Beta_Cracks - January 15, 2015, 1:32 pm

1. You can make some fake hack videos on youtube
- or
2. Post your rat on some CS:GO forums
