Thread: [How to insert this .GIF into this *Signature*](#)

?nnie - January 15, 2015, 11:17 am

I have been trying to insert a GIF into THIS signature

Spoiler ([Click to View](#))[http://i57.\[censored\].com/148nmex.jpg](http://i57.[censored].com/148nmex.jpg)

THIS is the GIF

Spoiler ([Click to View](#))[http://i59.\[censored\].com/6t31xv.jpg](http://i59.[censored].com/6t31xv.jpg)

If anybody could give me this I would be exuberant!

Also if you could explain the process I would be very grateful.

Thank you all, Annie

FOR NOW ITS (TINY PIC . COM) I WILL FIX AS SOON AS POSSIBLE

Raguel - January 15, 2015, 2:12 pm

Re-uploaded versions for the lazy people:

Do you just want the gif where the picture is? No editing to the gif at all?

Exactly. I would also love the white background gone on it. Thanks so much

"Sorry for the slow fix I worked today"

This was uh, a little hard for me?

I'm very sure other members could do this far better, but here's what I got:

Could I ask what you did? This is amazing. But this would have to be 650w 200h pixels for me to

use it

Raguel - *January 15, 2015, 7:10 pm*

I just inverted the colors of the actual text and cropped the gif into the section you set in your picture.

For the sides I blurred it (Surface blur for insides + blur tool on sides) with a PNG overlay so it doesn't look as grainy.

Then, I cropped out the top section so it doesn't look as cut out since I couldn't add a gradient overlay for whatever reason.

In the end I just went to good 'ole Save For Web and made sure the colors were lower than 1MB since I didn't know HF's limit off the top of my head.

If you need a more in depth walk-through or need help with anything you want to try on your own, just shoot me a PM!

As far as the dimensions go, it's 600 x 200, which should also suffice as a signature. If you want me to add the 25px on each side, I guess I could do that but it looks a bit tacky.

...Unless it's too big of a file size, which I can fix on my end :)
