Thread: [How to reset registration date in Wishlistmember Wordpress](#)

leonar32 - January 15, 2015, 1:14 pm

Hello, i'm new in this forum and I have a very low level hack.

I wonder if you could help me in this

I will try to explain me as well as I can ... there is a page that works with wordpress which offer a payment course in which I am very interested.

This page uses the (wishlist member) and after paying in clickbank they send you a link that redirects you (.com/wishlist-member/reg?=) to the page where you create a username and a password.

I could find the link and I registered to have access to the course.

But this course is divided into 7 parts; each part with your download link. But these links are blocked and will unlock every week (weekly unlocks - 7 weeks for all the content).

Today the company who sells the product has sent me an email telling me that the system tells them that I have not paid for the product and they ask me for the receipt. Obviously they have temporarily blocked my account until they receive the receipt.

As I have the register link I can make a new account and until they block me again I have time to download the content. But I can only download the content of the 1 week because have not passed seven weeks.

The question is ... Is there any way to reset the registration date (put 7 weeks ago) to gain access to all the content?
