Thread: [Decrypt sha1](#)

Kalle31 - January 15, 2015, 2:13 pm

Hey ,

im looking for someone who can decrypt me this hash :
B2D700284E75BA4D318182D21072D275F1A0705F

* I know sha1 is not decrypt able , but maybe with a database or so :)

10 Euro Paypal !

Are you sure it's SHA-1? It looks more like a new MySQL hash when it's capitalized like that.

Kalle31 - January 16, 2015, 5:04 am

It is from my MySQL Database , but if someone can decrypt ist 10 Euro PP fast and easy :)

Oh ok, so you are sure it's SHA-1? I'm just confused :P

Juggernauten - January 16, 2015, 5:37 am

This is not in any public hash database. Bruteforcing it seems to be the only way.

Bruteforcing, in the literal sense, is not a good option here. I would suggest loading some basic rules and a pretty good dictionary into OclHashcat and trying that instead.

Kalle31 - January 17, 2015, 8:15 am

I would now to 20PP , just PN me with your Skype addy if you have the Password

Forezza - January 17, 2015, 2:02 pm

-> Is this hash related to a password?

-> Was this recovered from custom software or something like a SMF board?

-> Can you find any salt column with that?

Kalle31 - January 18, 2015, 2:23 am

This is a password yes , its from my MySQL Database (Pserver Account)

Providing the username / checking if there is a column named salt would help greatly. Does the site also run SMF?

Kalle31 - January 18, 2015, 2:55 am

ID : lama9379

What do you mean with SMF ?

Would you maybe add me on Skype ? Write a PN with your addy :)
