Does the rep system have a filter?

I +Repped someone saying "You are a sexy faggot"

When i go look ag the rep on this users profile it says "You are a sexy Friend"

If i look at my reps given, it still says "you are a sexy faggot"

What the rep changed to: <https://hackforums.net/reputation.php?uid=2195187&page=2>

<http://img/71gmuj.jpg>. (Image)

So is there some filtering with the rep system?

Or was this a mistake lol?

Regards

I think there is some filtering don't know how far it stretches exactly though. So it may be like a word filter :p

such as "bum.p(minus the ".") can't even be said anymore

it would just would show as ing < even though i said bum.ping :P

Hopefully that helps buddy ;p

Edit: on a side note, i think your picture is broken ;P just a heads up. ;p

If you mean the word "f*ggot", it's filtered site-wide into "friend"

Saged - January 16, 2015, 10:04 am

f-aggot is filtered as faggot. This is the same across any medium on the forum; from posting to repping.
