(Sorry I can't post full links I have to make it like this)

Introduction:

Hello everyone, I would like to make a warming first impression to this awesome forum! Welcome to my thread ~Pr0xy <3.

I've decided to work on a massive project that is near to completion.

I'm going to put a download link so you guys can download it and create an account. It's totally free of charge. However, please do not claim this as "yours." If we do catch you doing that we will permanently ban your account and IP address from using our program. (Yeah and if you're reviewing this we would like credit, thanks!)

Information:

Anonymous Logger is basically an all-in-one skype resolver, dns lookup, geo lookup, stresser (that is to come), skype resolver, and the main factor - a free ip logger, that will display the ip address logs in the program! The website address of the logger will be formatted like this: yournightmar3.com/uploads/(your name, so choose it wisely).png

We are adding way more soon, updates almost everyweek!
