Just finished it. It was decent, but they def. left out a lot of things about this Fairy War they keep mentioning, and who Andou ends up with.

There def. needs to be a season 2 of this show since the manga is still on-going, because there's a lot left thats unsaid.

To those who watched the show, what do you guys think?

I mean it had it's moments but then the "fairy war" came in which they mentioned nothing about until episode 8? I think. The anime was completely terrible.. I mean I watched the whole thing but I did not like it.

Yeah it was okay to me. It wasn't amazing, but so much was left out and there needs to be a season 2 of this.

It was pretty shit. Didn't explain anything at all. Was stupid too. Even if they made a S2, wouldn't change anything for me.

Taiga - January 17, 2015, 1:35 pm

I'd give it a 6, maybe a 7. It was very watchable, but as we said before, it didn't explain shit about the Fairy War.

If there's a season 2, it would def. explain a lot more. Maybe I should read the manga but eh.

I don't think they'll end up giving it a season 2, I wasn't really satisfied with the ending either.

First episode: HYPE

Fourth episode: Meh, I'll catch up next week (never got around to it)

Show finishes airing: Ok, let me finish it (starts from episode 5)

Episode 10: fuck this show is dry. I'll just watch it some other time

Now: It was OK. Definitely something i would have watched last year when i first started watching anime but for the most part it was pretty uninteresting. I haven't finished it - all i want to know it what his power is. They sort of hinted at it at around ep 9 or 10 but i lost interest. Did he burn himself with

his powers?

neightworks - January 17, 2015, 4:12 pm

I dropped after the first episode then picked it back up because of a gif from episode 2 that caught my interest. But then it went straight down hill again after that.

Finished it anyways though, and would probably watch another season.

If you did somehow enjoy this check out: Saenai Heroine no Sodatekata.
