Thread: [Hey i wanna learn how to deface a website](#)

Joaquín "El Chapo" Guzmán - January 17, 2015, 4:04 pm

So i feel like i've been a skid for long enough and actually wanna start learning stuff does anyone know a guide to deface a website? like the basic things that you have to know and how to do it?

Simply™ - January 17, 2015, 4:13 pm

Use some YouTube tutorials. It's not really worth the time, you don't gain anything but lelz (unless you decide to blackmail the owners)

I would suggest you to start learning PHP(it isn't really necessary) and then to start hacking web sites.

You have bunch of methods to deface site: SQLi, XSS,RFI,LFI,Shell upload etc etc.

All this methods you can find on YT.

And after few months you will understand all these methods.

I was like you, everybody starts from bottom.

sam2011hacker - January 18, 2015, 1:56 am

you are on a forum where there are 1000's of tutorial on how to do this. Start with sqli. Then learn how to upload a shell on server. After uploading a shell you can easily edit their index page with your deface page's code. I would prefer not to deface any public site. I was the same person once who wanted to deface 1000's of sites but thats not how it works. Learn how to do it but don't do it. Deface it after taking their permission to find vuln's. It takes a lot of time and pain to create a website.

Troja?Hors? - January 18, 2015, 2:00 am

Hello,

if you PM me I can help you, but only I can only get into websites that are vulnerable to SQL Injection. However, I can show you a quick easy way to do this. There are a lot of tutorials on here buddy, you shouldn't find it that difficult to find one or two ones that you understand.

Regards,

TH.

Joaquín "El Chapo" Guzmán - January 18, 2015, 2:41 am

I looked on hf but didnt really find one :| and on youtube they only show you what they hacked not really how they did it

TheWholeWorldExplodes - January 18, 2015, 1:26 pm

> doesn't want to be a skid

> asks how to deface.

Yeah cus that's going to work isn't it

.

Phantom Lord - January 18, 2015, 2:38 pm

Search on the forums lmao, they're all over the place.

Infinite' - January 18, 2015, 2:44 pm

I don't seem why people are posting "search the forums", especially when people barely have 30 posts. It's obviously you trying to get your post count higher, but if you are going to make a statement like that I suggest you provide links to them instead of wasting the OP's time.
