Thread: [ETA flare to update to 1.8?](#)

Vruneum - January 18, 2015, 8:58 am

Most of the servers run on 1.8 now and I can't play
I've been waiting for too long, Is it going to be updated any time soon?

"Sooner than you think" "Soon enough" "Exactly when you think it is"

Serious: the Developers are working really hard to play hyrule warriors update it to 1.8, but have no idea when it'll be done.

drc00k3.14 - January 18, 2015, 9:04 am

Godshawk is dead so not developing flare atm. I can't find anything in the flare thread about the future of flare but some people are saying its being developed.

thehen101 - January 18, 2015, 11:50 am

Yes the Flare dev team don't want me, and I could really help get it updated to 1.8.

accept me please k

You can never tell with these kind of things.

Otakutrash - January 19, 2015, 8:46 am

Flare living to their word.

We used to have an update put every week but there was always something that was wrong or we were a tad bit late. We can't account for things that we didn't know would happen.

@OP

I have been outside of Australia for the past 2 weeks. I want flare updated by the end of the month (that isn't an eta but I am still wanting it out by then). No promises for a date of release though.
