Thread: [Free YouTube Views & Dailymotion Views](#)

Subayaku Kokoro - January 18, 2015, 4:42 pm

Hi to all members.

This Website will be updated as often as i have time to develop new tools for it.

At the moment you can use:

- YouTube 301 Video Booster

Just insert your Video-Link and click "boost". Within a blink of an eye your video is updated to 301 Views. I developed this method by myself. Its nothing special but at least some free views.

- Dailymotion 500 Views Booster

Working the same like the YouTube Booster. Just insert the Dailymotion Video Link and click "boost" . After boosting, just wait some minutes and check your video. You can use the same Link multiple times, so you will get +500 Views everytime you boost.

-Instagram Picture Downloader

I was bored so i developed this littel nice tool. Idk if you can need it or not ^^ . Just insert the username of an profile and click "get 'em". My script will collect the 20 newest pictures of the profile, zip it gives you a downloadlink so you can download it.

-Free YouTube Comment Scraper:

Just insert the Videolink and the comments will be scraped, saved to txt, zipped and you can download it. awesome stuff..

-Free Proxy Scraper:

As i know you all need proxies for your tools, i added a proxy scraper to my site. Fresh scraped proxies everytime you click.

-Free Article Spinner:

You got an article in spintax form? Sick to generate articles one by one? Use my Article Spinner. Insert your Text (Form: I {want|know|believe} you) and input the amount of articles you want to generate. if you want to have your files sorted, choose a prefix for txt files. One click and within 1 second you got up to 1000 spinned articles. All Articles willl be zipped together and you can download the zip file.

What else is this page for?

- Promote your Scripts

You got a a nice tool you want to promote? No problem at all, supply me an api and i will integrate the tool so people can try it. of course there will be a link to your website too where people can buy the PRO version if you have one.

- Advertise

I am quite sure, once there is a nice collection of awesome tools, there will be lot Visitors.

You want to advertise with banner or text ad? Just write me a PM and we can talk about.

Here is the link to my website: [KonVex](#)

Awesome Site you got here KonVex certainly earned a bookmark from me!

My Suggestion for the site: Maybe add Soundcloud Plays/Downloads/Followers?

About the Yt-Booster and Free Proxy-Lists. YT-Booster is down at the moment, because i am adding some features. The Free Proxy-List is currently down because i have to pay my proxysubscription, but this stupid paypal limited my account .. so for the moment i have to wait like 60 days before i can use the money on it .. really i cant understand how paypal could be this famous .. as seller you only have problems with it .. if just all sellers wouldnt use it anymore paypal was fucked...
