Thread: [Crashed IRC?](#)

FI0urite - January 19, 2015, 1:46 am

My C&C irc crashed with like 150 bots lol and I couldnt even connect to the server, any ideas? did I ddos myself? thnx ?

its hosted on a rooted gaming server (fps) so I dont think there would be any lag with 150 bots

Is the complete host down or only your irc server? If only the irc server crashed, then connect via ssh to the server and maybe find logs and restart the irc and see what happens.

Which botnet did you used?

I don't think that 150 irc bots can crash a "gameserver" .. maybe if its only a 2 slot minecraft server X) ..

Cheers ?

I was thinking that is was under a DDoS attack since the ping was like 2/200 reqs gave me a reply

its back up now but all my bots are gone, I may have to wait for all of them to restart lol

Either that, or, you just had your bots stolen ?
