Hi, Unable to find the plugins I'm looking for. Have a theme but can't get the Plugins from the theme creator's site eagle-themes

I managed to find the other plugins and install them manually, all except the 4 below:

Eagle Booking

Eagle Core

Eagle Demo Importer

Envato Market

Can you point me in the direction where I can find these plugins? This is a recurring issue for me where I find an awesome theme, install Wordpress, start to import the demo content and plugins and find out that the plugins are locked into the theme creator's website i.e.:

Installing Plugin: Eagle Booking

Downloading installation package from

Download failed. Not Found

TGMPA v2.6.1

Return to Required Plugins Installer

Any help would be much appreciated!
