Thread: [\[Done by Deadline or Moneyback!\]Java's Java&PHP Programming Service](#)

JavaProphet - January 19, 2015, 11:37 am

I specialize in networking and automation, and have been working in these two languages for 5 years. I can make a program do anything a person can do, and have a mild specialty in AI.

Portfolio:

Bitpots.Com - BTC Gambling site, now sold and shut down.

JavaWebServer - <https://github.com/JavaProphet/JavaWebServer> - 100% functional HTTP/S webserver in java.

JavaMailServer - <https://github.com/JavaProphet/JavaWebServer> - 75% functional IMAP/SMTP server in Java, not completed.

JavaSocksServer/JavaSocksRelayServer/PSOCKS - A socks 4/4a/5 implementation in java, relay and server. WIP is a custom protocol designed by me to reduce ping, increase speeds, and be more secure any anonymous than SOCKS5. I currently use this technology on all connections.

AnimeGet.org - Anime site

"AutoFullAccess" - no proper name, a program that fully automated the process of making a Mojang/Minecraft account full access. This involves receiving email, and submitting many complex AJAX forms, etc. Java.

And many, many, more projects. Some plans for experimental software is a webbrowser built completely from scratch, and further development on my java crypter.

FAQ:

Q. What is your price?

A. I have a flat rate, that we can negotiate over skype.

Q. Do you design?

A. By proxy, I can hire out for you at a small fee, I have several good designers to choose from, and will handle all communication(you can if you want).

Q. How does payment work / what is accepted?

A. I accept PayPal, BTC, Bank Wire, among others. I generally require half before and half after completion, but depending on the person I may offer/require different terms.

Q. How quick are you?

A. I pride myself in my speed and work ethic, and will easily dump 12 hours a day into your project. Many projects can be completed in < 1 day.

Q. What if you pass the deadline?

A. If a deadline is set, I will offer partial refunds until the project is completed, or in the circumstance that you wish the project canceled, we will negotiate terms based on time input. I've never missed a deadline once.

Interested in learning more, or getting a quote? PM me your skype, or add me on HF XMPP.

SKUZZ - January 19, 2015, 11:39 am

Vouch for Java, he is a great dev who can get your shit done, and done well.

MrOrang - January 19, 2015, 11:40 am

Vouch for Java prophet, has a lot of knowledge.

Graphic UNIVERSE - January 19, 2015, 11:42 am

Vouch for Java, have done a lot of deals in the past with him

TheTurtle - January 19, 2015, 11:42 am

Vouch! Java is a great coder, owns the big businesses. Great services :)

XuidDump - January 19, 2015, 11:43 am

Huge vouch for this guy, he really knows what he's doing!

Suspect???? - January 19, 2015, 11:44 am

Vouch for my nigga java been running 3 sites with him hes trust worthy and knows what hes doing.
?

Errors - January 19, 2015, 11:48 am

Voouch for the 5 star War Lord, he knows what he's doing ?
