Thread: [High Roller Theme \[First Theme\]](#)

CodeBinary - January 20, 2015, 5:08 am

Credits:

AenonHack For his themebase's

Me for Design

?eumonic for the textbox code

Mavamaarten from youtube for getting me started and for groupbox, theme, button code.

Hydrogen for progressbar and seperator code

Sorry that I took so much I just wanted a theme that I like but Didn't know much about VB. (It's a bit long 3 theme bases xD)

nathan72389 - January 20, 2015, 5:23 am

even though you simply copy and pasted everyone elses codes into your class.
that has got to be the ugliest theme on the net.

I know its not that good but Ive seen way worse...

Only3 - January 20, 2015, 5:42 am

me too also ur choosing colors can make it better

MrRapidz - January 20, 2015, 2:14 pm

This can basically be made without even adding a theme. What is the point?

I love how you see things my friend. Give this man some cookies.

NETExplorer - January 20, 2015, 3:03 pm

4500 lines of shit for shit?
Why bother

IntelliJ - January 20, 2015, 3:20 pm

Can ya'll stop fucking hating? If you don't like it, close the tab or just go back to the general browsing section.

So negative. Jesus christ people learn some respect.

Can you stop fucking hating and let people voice their opinions?

Last time I checked you don't run this fucking section

ya bruv

We all know Pat runs this bitch. The fuck you are nigga?

maruata - January 21, 2015, 4:39 am

WTF! It a nice start! Thank you for sharing the Code anyway and keep up your designing skill...

IntelliJ - January 21, 2015, 5:06 am

I have no problem with you voicing your opinion, just do it respectfully. It's not hard to be kind - "I personally don't like this design. 4500 lines of code is a bit much for me." Not hard, that took me barely 5 seconds to type out.

NETExplorer - January 21, 2015, 2:48 pm

If my opinion contains non-respectful aspects, you can bet your ass I am still gonna be voicing it

Why botherOpinions? Oh boy my turn!

Aeonhack's themebase is over-complicated and isn't needed for any single theme I have ever seen. The code behind it is great, but some of the stuff in there you'll never need to use. I still have no idea why the whole color saving system exists.

Code 'used in "sub new()"

```
SetColor("Border", Color.Black)
```

'used wherever

```
Border = GetPen("Border")
```

Just make a new pen variable or inline if it's only used once.

And the DrawCorners method? Why not just use a rounded rectangle to begin with?

DrawBorder? Simple one-liner.

HF removed the rest of my last edit. I'm apparently not a human. In short: "Oh wow, a few rectangles and out-of-place black borders!"

ninen2001 - *July 18, 2015, 1:38 am*

Myself I like it and may even use it. Come on guys, it's his first theme.
