Thread: [Best Things Made By HF Members](#)

Scymo - January 20, 2015, 8:04 pm

I love supporting Hf member's ideas. Some of them are really helpful. Making a list of all them.

List:

www.killer.org - encrypted mail

www.Payivy.com - i think everyone knows this one

www.viewmy.pm - Export your MyBB PMs, upload them afterwards, read them on any platform you want. Currently Down. Made by [Snorlax](#)

www.Minus.com - beautiful image uploading service Made by [Minus](#)

www.VideoDownloader.IO - Downloads videos in MP3/MP4 format from almost every site on the internet. Including, Facebook, Instagram, Vine, YouTube, & many more.

www.Bonfire.PW

www.msil.pw - Beautiful online crypter

<http://#.org/>

<https://mostwantedhf.info/> - best skype resolver

<http://www.Omnico.in> - official crypto currency of MyBB communities, and has been developed by multiple members over time including Crypto Miner, Crypto, Doctor Blue, Myself, and Abraham Lincoln

Jays booter (i can't find a link)

www.Uploadto.us

www.Pastr.me

www.Filelce.com

PingServ

nVPN

Not looking for ebooks/social media sites, looking for unique stuff.

??Zèb* - January 20, 2015, 8:08 pm

I am currently forming my own unique social media. It is like a new facebook but has alot more features. Not going to post it yet as it has awhile to go..

Nostril - January 20, 2015, 8:09 pm

I'm pretty sure everyone knows that skype resolver made by most wanted.

FRANKIE - January 20, 2015, 8:09 pm

nVPN started on HF I believe. It is a rather good service and legit business now.

Douchebag # 145 - January 20, 2015, 8:11 pm

Check out my website, it is located at: Hackforums.net

Quoted for the truth nvpn has developed itself to a widely known and legit service over the time, as well outside of HF.

Other than that i cant recall much else, 95% of projects started on HF usually die within minutes/hours/days/months.

Or to name something else it would maybe be darkeye crypter, this crypter seems to last for a long time and still up to it's quality, though not personally using it.

specialkay - January 21, 2015, 12:58 am

I developed a service called PingServ that helps you monitor your websites and servers. Let's you know if your website/server goes down and has some neat graphs, public page etc.

Pew ? - January 21, 2015, 12:59 am

The best thing made by Hackforums members was money.

Auxil - January 21, 2015, 1:04 am

A good friend of mine on here, I think his username is vax or something, owns youtube.com/alltrapnation
Almost worlds biggest Trap channel.

He isn't active all that often, so I usually become forgetful of his exact username.
Great guy though, and the music on his channel is INSANE.

Declan? - January 21, 2015, 2:34 am

I personally think the 2 best things made by HF members are <http://pastr.me/> and Omnicoin.

Mostwantedhf.com is a pretty popular resolver.

Handsome Banana - January 21, 2015, 6:18 am

Some of the RATs that have been made purely on HF are good. The ones that got lots of people in trouble with authorities.

funtela - January 21, 2015, 6:28 am

Had never heard of KillerMail before. Just made myself one :)

Black Vlad - January 21, 2015, 6:39 am

Many softwares I guess, also a lot of useful websites like Payivy.

La Cocaina - January 21, 2015, 6:40 am

No one ever mentioned Minus? I personally think it's the most successful one around.

Minus was made by a HF user?? Who made that?

ISO - January 21, 2015, 6:43 am

Payivy may be the most popular achievement from here.

I remember Galaxy crypter project to be a great product too but unfortunately it isn't there anymore...

Who made killer again? I am mind boggled that someone here made minus.com

A drawback of minus.com is that the image is lq.

'Snorlax - January 21, 2015, 7:36 am

I think somebody from HackForums did create FileIce.

FormerlyS - January 21, 2015, 7:40 am

I think it's the generators (actually dispensers) that became so popular due to HF <3 ?

File-Ice was made by a member here.

Also, my xDDoSeR back in the day had over 20k people on it (it was spread throughout other sites as well from it being free).

CrackedOut - January 21, 2015, 11:36 am

I think Sellurs is pretty good, and also the 133t ddoer... Nanocore is decently good to.

Krew - January 21, 2015, 1:09 pm

I would like to contribute to this thread by saying that NanoCore and/or Net Seal is/are a very good candidate.

I made all of these websites:

I don't think it's around anymore. It was a website which container public and private db dumps and

you could pretty much find anything about anyone on there. Kind of shady but yeah.

Anyone who's ever resolved a skype account has most likely used most wanteds resolver.

'Snorlax - January 25, 2015, 12:27 pm

You can remove my site <http://viewmy.pm/> from the list. I forgot to renew the domain, so it will cost me \$35 to renew for another year. 35 bucks I don't currently have, so I don't expect to renew it anytime soon.

The files and stuff is still on my server though. All I need is a renew. Unless someone wants to renew it for me, this won't be up for another few months.

Sorry.

Nah I don't like ads and I don't want other people to watch my ads. The site was designed to have no ads as well.

Appreciate the thought though. I just need \$35.. which is ridiculous.
