Thread: [Idea that stops all the war, Bad idea or good idea?](#)

Alright, I know this is a bad idea, but yea, still gonna tell it.
Alright, there are alot of country's, having war and stuff,
Why shouldnt we just nuke them?

Its the same as killing everyone, but nuking is faster, They should make a agreement, that If you dont STOP the war, they will just throw a nuke on you, and it solves everything, Probably America is gonna do this,

Please dont take this too seriously, I know its a bad idea, please post your opinions, no trolls.
thanks.

To be honest my idea is nuke the capital of all our enemies and take them over so we get their resources.

You cannot just nuke a country for having a war. An eye for an eye, it does really apply in this situation. There are alliances that will seek revenge on the country that nuked their sister countries.

Yeah...well what about countries that already possess nukes and are at war?

Their response would be, "If you nuke us then we will nuke back!".

Which would leave us exactly where we are right now.

Yea, If you want to do this, you have to probably play it safe,
But the problem is, alot of innocent would die, I think the country itself doesnt want that too?

A agreement should be more effective.

If you nuke them first, the whole country would be probably already raped,
And If America is gonna do it, trust me they have a pretty good defense for nukes.

The problem is that this would affect all the innocent civilians in that country, and if that country is exporting important materials or food/water to other countries, it could become a problem for those countries.

Because if we start using nukes, they'll start using nukes, if that happens then that will cause some serious stuff, much worse than the wars going on.

Have you ever heard of nuclear winter and retaliation?

The world would literally end if we nuked another country.

Rooter - January 21, 2015, 7:37 am

Nuking countries would be a horrible idea. The other countries would retaliate and tons of innocent people would die.
