Thread: [Making MW2 external console](#)

Fruit Snacks - January 21, 2015, 9:55 am

hey guys,

so i wanna make a mw2 external console which basically instead of going in the game and pressing "S" to open in-game console and then typing in the console any command such as "cg_fov 89", I wanna make like an external console which will be simple it has a Textbox where i type my command then a send button where it "injects" or "sends" directly in the game the command or commands (all that without using the in-game console).

I pretty much need help with how to make the "send" button function. I'm doing this for educational purposes. So whoever is kind enough to help will be the best <3

It's already in the CFG's, so it's a bit pointless.

Anybody can help? or not just need the send command to mw2 code
