Thread: [\[TUT\] How to Use Free Proxy Traffic For Web Site Hits LQ Traffic](#)

botrus - January 21, 2015, 3:55 pm

Hello,

Wanted to Share this Method with People who didn't know about it.

1st I always think you should do everything in VM

Download this program Here

http://www.optinsoft.com/listmanager/Setup_WPC.exe

I had to turn off my AV to have it install just FYI (It's not a virus)

(DO NOT DOWNLOAD THE PRO VERSION UNLESS U HAVE A CRACK)

Move down and click on

Free limited version of Web Proxy Checker

[img]<http://www.optinsoft.com/pic/web-proxy-checker-pro.png>[/img]

Once Installed We need to go search for proxies. Tons of people have guides on how to get this for free. I'm going to do this the easiest way you can.

Go to Google and type Free Proxy Server List

Few easy Sites. We need HTTP proxies

<http://proxyserverlist-24.blogspot.com/>

<http://sockproxy.blogspot.com/>

People Post Http Proxies here

[VPN, Proxies, and Socks](#)

Use Google and Make a huge list into 1 text file

Copy and Paste a huge list (Of hopefully current proxies)

You just want to copy and paste a large list and called it

Mondayproxy.txt on ur VM desktop

You can use this web site to fix dupes (pointless to have the same proxies 2 time in a list)

<http://www.textfixer.com/tools/remove-duplicate-lines.php>

Ideally you are going to want to scrape and check your own proxies and compile a list to the proxys are fresh.. There are a ton of programs that do this. I want to show you just how to use this program for right now.

Click on the

[...] and import your list. This is next the the [] Random 1000 On top the right

<https://gyazo.com/ad327dd5247b8b8b066b999a27c5af9f>

Once you have a large proxy list loaded (Longer list are better to hit more)

You can load up a few list with different names ect

Now for the Fun part

Type in a URL u want to send some proxy traffic to. This will just send 1 second hits from these proxies

<https://www.seoclerk.com/>

You can boost your service page to be a most viewed service on this web page

Lets Test

I have only 25 views on my service here

<https://gyazo.com/6dda2544848eb2b35894b0d9f2368f57>

In the URL field in the Web Proxy Checker put ur URL you want boosted
Understand this is all proxy, lq 1 second hit traffic, it will get u banned on some sites.

My URL would be

<https://www.seoclerk.com/XXXXXX/XXXXXX/XXXXXX>

Click on Settings

<https://gyazo.com/d3ec5392050b876701ec3f543577ef63>

Threads is how many threads u want to hit this will depend on ur CPU/PC
Do as much as can without lagging out ur pc
50 should be fine

Set your Good Proxy save to location to whatever u want

Set your Bad Proxy Save to location to whatever u want

Once Setup Click Start

<https://gyazo.com/ca126080523fa4d7567dbd85983fdb88>

The Program is going to run and you will see results like this

<https://gyazo.com/6e4bdb20158941725b23c951286e36ac>

I'm just hitting my site for 1 second with these proxy Ip address. This will create a LQ hit on some times (Please NOTE SOME SITES)

This is just sending proxy traffic to a url.

Results!

I had 25 Hits on my page Before

Final Results.

<https://gyazo.com/c5e64fd7a0147087ada07cb575c9c8b2>

All Done

<https://gyazo.com/c118f358a48209d169ddf85e43fff331>

From 25 Hits to over 1500 in 6 minutes

Now when people search for most viewed page mine will be higher up on the search. This is just an example people.

Now let me CUT someone out of making money

<http://kaceytron.topstreamers.com/>

My Ex gf lets help her out

<https://gyazo.com/45dacd815daaa407a73173e45f735476>

If you right click on the Vote Icon

<http://kaceytron.topstreamers.com/vote>

Grab the url and put it in the Program URL

Hit Start! I just created a Vote Proxy Service FOR FREE!

Lets see my method in Action! So kaceytron Had 572 Votes Correct

<https://gyazo.com/726d044d90efefc020c77d329c4b18b4>

I just stopped it as it worked REALLY WELL!

<https://gyazo.com/63e99e4669192a4319ee8088df1a776b>

<http://kaceytron.topstreamers.com>

1385 VOTES?

Damn I'm good! <3

HitLeap - Free Website Traffic

You can get more Traffic with this program as well

I WANT TO ADD THIS WILL %100 GET THE STREAMER BANNED if you go 2 hard. I have already banned some for \$\$ and some by my bad!

I think I will get kaceytron banned from this voting site for sure or make her #1 either way.

If you have enough proxies u can get X streamer to the top. The web site see's the proxy traffic so don't go getting others banned.

Anyways just 2 examples on what you can do with this method. I'm sure some people will open up voting sites or banning services with my free method. Have fun :)

DO NOT USE IT FOR

Youtube, Twitch or CPA this will get you banned and not count most of the time.

If you get a web site or person banned with this method it's your own fault.

FAQ I'm not getting any good hits

You have bad proxy get fresh proxy or learn to scrape or check vs a url you are using, there are other guides on here to learn about that.

You need to understand 1000's of people are using these free proxies and most get banned or get there ip's deleted or blacklisted very quick. The more sources you have the better. It's a numbers

game get as many as you can and please check them. THEN run them for Proxy Traffic.

If you liked the method Please leave me a thank you below. I am happy to help anyone with any questions in all the comments below. Do not PM me I get so many a day already.

I would hate to see someone sell this method as a e book Lets share and keep HF HQ people :)

UMirinBro - January 21, 2015, 4:41 pm

so this is not a web based proxy ???

botrus - January 21, 2015, 4:42 pm

^^ all of these proxys and this method will be http proxies and should work for most web based url's

botrus - January 27, 2015, 10:45 am

I would of thought more people would enjoy this if they took the time to read about it

DeCompOseR - January 31, 2015, 5:01 pm

It is a good method but the problem remains it is LQ and no one wants LQ traffic on their site.

Few years back i created a software of my own that does the exact same thing.

Its a nightmare to have a traffic like this on your site.

Valkren - March 30, 2015, 10:41 am

what does VM mean :/? im new but im pretty sure things shouldn't be abbreviated in tutorials ><

botrus - March 30, 2015, 1:41 pm

It's Virtual Machine you can see ton of youtube videos on how to use this

StormCrewz - May 2, 2017, 6:50 am

bro send my a massage at skype: stormstorm151

Rangers. - May 2, 2017, 7:44 am

Pretty long tutorial. Anyway thanks for share. Bookmarked this thread for later :)
