I need to buy a money making ebook. A working one which does not require tons of hours sitting on a desktop. I really need the best out there which is long lasting, gets money and no scams. My budget is around 50\$.

I would love to get a help from this community :)

AdGateDan - January 22, 2015, 1:05 pm

I have never in my experience found an ebook that is worth the money. You can find plenty of good information completely for free.

If you are looking for niche ideas try using Google's Keyword planner to find high volume keywords that you believe you can deliver value with.

I don't know if this is allowed but alot of them are leaked and not even worth your money. They all end up telling you the same thing. There are plenty of great guides here already that are in the message. I think sonex posted a massive one linking you to all of the ones he thinks are good.

NyT3z - January 23, 2015, 6:57 am

Do not buy them, most of them are just a waste of time so its not possible to suggest the best one. Good luck.

Rageki - January 23, 2015, 2:28 pm

Buying these ebooks is like joining a hyip, don't expect any returns.
