I'm really happy, I bought this PC a while back and for some reason I thought I tried playing Skyrim on MAX settings before and it wasn't good enough?

Nvidia GTX 760
Intel i5 4440 @ 3.10 GHz

I downloaded it again yesterday, set it to ultra settings and also around 20+ mods such as 2K textures and I don't think I even experience any kind of lag...

Just super happy that I can play my favorite game fully maxed out!

That's awesome! I remember on my old computer I could only play the game at medium with no graphics mods, now I can run it at ultra with pretty much any graphics mods.

Nvidia GeForce GTX 770
Intel i5 4690k @ 3.50 GHz

Let me know what graphics mods you use, I'm looking for some to make my game look great!

You should get an ENB mod, I think you should be able to run it with no problem.

I wonder if anyone has modded the shit out of Morrowind to bring it up to date graphically, because that game is probably my favourite Elder Scrolls game of all time, and I have played them all.

It's my favorite too, I think they have made some advances in it but not fully.
