Thread: [Suicide Booter *Shell Booter /w Updater* Source](#)

jkrules420 - January 24, 2015, 9:03 pm

Hey guys, I actually released this shell booter a few weeks ago, but just today I released it on HF. I've made quite a few Shell Booters recently, The first couple were complete trash since I wasn't doing webrequests correctly. The next few would send a attack then crash after sending 1 shell attack. This is the newest one I made, It works very well each time I've tested it, one of the flaws is I'm still learning how to properly do multi-threading and since I'm not using Multi-threading it sends the attack kind of slow, not snail slow, but it could be a good bit faster if I had multi threading in it. Anyways I'm sharing this source code for a few reasons:

1. I'm hoping someone will help me with making this program Multi-Threaded.
2. I may be mistaken and correct me if I'm wrong but, I haven't really seen a working Shell Booter source on the the forum .
3. I've decided that it is my time to become more active on the forums and give back to the community that has helped me many times since I created my account.

Well I hope you guys find this source useful and anyone who knows how to use threads would help me set up this booter to be multi-threaded will be highly appreciated.

I highly recommend looking at my Program Updater Tutorial since suicide booter uses it:

<https://hackforums.net/showthread.php?tid=4653315>

I used Visual Basic Express 2010

nuk - January 25, 2015, 6:27 pm

Not trying to bash OP at all but aren't Shell Booters in VB a thing of the past? Now I may be (and prob. am) wrong... just wondering is all... Thank you to the OP for sharing either way ;) +1 for contribution :)

C A R B O N - January 26, 2015, 7:08 am

Carbon Booter V2 is top shelf source, take a look.

Idk why this is so funny. ?

BrAnCHeD - January 26, 2015, 9:52 am

I would like to help you making the multi threading :) ! Please send me your skype name in a PM , i dont have enough posts ,_,

Graphic. - January 28, 2015, 10:48 am

Thanks for sharing this booter op. :)

Hellegaard1 - January 29, 2015, 2:36 pm

I have fixed some of the code, uploaded source to my google drive here: <https://drive.google.com/file/d/0B9swLeS6isPFWENWZkoWEkZXaEE/view?usp=sharing>
It has the changes in the version number code change section of code.
If you dont mind taking a look and merging my code that'd be awesome :D
Sorry can't post links due to not having 50 posts>.>

LegitGamer - May 25, 2015, 11:37 pm

Hey Man This Is a clean And Easy Source Thank You For It

CobraEffect - May 30, 2015, 7:56 am

Thanks for sharing the source +

iTzSuper - June 6, 2015, 2:09 am

It was a bit confusing to get working, but after a bit I finally got it, without the updater. This would be better for people to learn how to code a simple shell booter, more then being a booter itself.

Holy thread revival, batman!

Kiazio - May 31, 2016, 5:13 pm

I'll download cause the real video got taken down, but the real guy who made this was packhack so why do you have to copy source code lol
