For what purpose? Botnet or something? I've heard that SPAM is good, but I'd just get a cheap package at a paid place imho

A??? - January 25, 2015, 10:02 am

Im trying to setup my own web booter, i have the soruce and everything but i cant find a good web host.

I tried SPAM, but i cant find some sql files.

ankithhosya - January 25, 2015, 10:09 am

WHAT R U SAYING ?? SPAM HAS IS VErY good for setting up booters and in my thinking, it should have all sql files present.

David Tennant - January 25, 2015, 10:24 am

Most free hosting companies will shut down a web booter in less than a day. It doesn't even have to be a booter, some of them just detect high traffic and don't want to be responsible if anything illegal is happening/don't want someone chewing up all their bandwidth.

Not always, it's like with botnets. If you have a lot of traffic or users or bots or whatever, it'll get detected and taken down. If you're small and unsuccessful, then it's easy to stay under the radar.

bytedeez - January 25, 2015, 11:19 am

You can setup ubuntu server in a vm and host it yourself.

also you try byethost. (<< not a typo , it is spelled byethost)

Please don't advise people to host booters/malware/anything illegal at all on their own servers...

Crashes - January 25, 2015, 1:28 pm

Look up 10x hosting. I've used them before.
