Thread: [Recover a HTML in form \[VB.NET\]](#)

Kulls - January 26, 2015, 8:55 am

Hello,

How to recover a html page in a form visual basic.

I code in Visual Basic Express 2010.

Regards,

Kulls

iSynthesis - January 26, 2015, 8:59 am

PHP Code

```
<?php
```

```
Textbox1.text = new WebClient().DownloadString("Link")
```

^ Short way, i recommend using webrequests, but it depends on what you're trying to do.

Should dispose of it though.

Use "Using"

E.g.

Code Using OPsAFag As New WebClient

```
textbox1.text = OPsAFag.DownloadString("Link")
```

End Using
