Thread: [{QUICK} {OFW} GET YOUR IDP NOW!](#)

nondescriptoldie - January 26, 2015, 10:12 am

Get your IPD's before this method gets patched. This allows you to do many things with your OFW Ps3!

Method:

1. Download IDPStealer [here](#)
2. Open CMD and drag IDPStealer's program into the CMD window.
3. After the above step do a space and then type "-p 8080 idps.bin"
4. On your PS3 go to the proxy and type in the proxy and the port. So it would be: "1.1.1.1.1.1.1" PORT:8080. (Replace 1.1.1.1.1.1.1 with what it says in your CMD".
5. DO NOT CLICK TEST CONNECTION. Now quickly navigate to the "Whats new" and DO NOT SIGN IN!. On the Whats New just keep backing out and into the thing until you have your IDPS on your computer.

I have 2 Super Slims OFW, a phat and also 2 other CFW consoles. One of my Super Slims has a custom ODE and the other is literally just there! I done this method with this and were able to retrieve my CID. I could then decrypt the backup! ?

Quick guys! I heard that Sony are aware of this now! :P

Astek - February 1, 2015, 2:49 am

I believe this is already patched ?

nondescriptoldie - February 1, 2015, 4:14 am

(Feb 1, 2015 03:49 AM)?static? Wrote: [\[CITE\]](#) I believe this is already patched ?Nope? Where did you get that from?

I stole my friends IDPS yesterday ?

nondescriptoldie - February 1, 2015, 4:15 am

Ignore this post! Was lagging as fuck ;O

Reptilian - February 1, 2015, 8:02 am

Sooo... what can I do with my idps?

Astek - February 1, 2015, 9:00 am

Your IDPS is your identification # for that console (CID/Console ID). They look like this

Code 00000010085000810037E89335EDBA4People sell them depending on their level of security, whether it's shared with other modders or not. Shared IDs go for like \$10-\$15, private ones go for \$25-\$30. This is what modders need in order to play online so they tend to buy these a lot.?

I steal them from my friends and from my enemies. Say I go round my friends house and they have a fresh OFW console I wait when they are in the toilet insert my USB and get to work! ?

I don't like that, pretty sad thing to do to your friends.

So this would only work on your OFW, will this work just to test on CFW to see that it works or na?
