Awesome dude, I finally found a legit and working one of these things, Worth every penny to buy this. Also, I am going to write an Honest Review on this Generator after I've fully tested the generators (Both the Origin and Netflix).

PS: You need to update the accounts again, Please. (For both!)

Nice looking thread design!

Did you purchase the generator off Damien? I am interested in buying one of his generators so I can start my own, does it work well so far?
