Thread: [Scammed by _Stoner 500\\$ uid= 1070595](#)

Larry David - January 26, 2015, 7:52 pm

Bought _Stoner's HttpLoad, for those who don't already know it's been analyzed by some people on this forum and on another forum.

- Product is backdoored.
- Does not have a rootkit as advertised.
- Saying he sells 10 copies, sold alot more.

Tried to reach him thru PM and got insults instead.

I know very well I will not get my money back and that's alright. I've learned not to buy stuff on HF and 500\$ was the price to pay to learn it. I'm making this scam report so that other members don't get scammed like I did.

Post some screenshots of payment proof.

This is pretty sad if he did.

MrPip - January 26, 2015, 7:56 pm

I doubt he scammed you, I will put my rep on it.

VRUMM - January 26, 2015, 8:06 pm

This is ridiculous. I just made a thread several hours ago of ban evaders making nonsense threads to sales trash products on this forum, and now there is a scam report made in favor of their "research/analysis".

You are quick to judge if a product is shit because some ban evading kid said so? Why don't you ask someone more trusted..anyone other then them. I can assure you that one of the people that posted those threads was selling malwares/Botnets on HF before he got closed, and is just jealous of some of the sellers' success on here.

Phishing link was my first bet.
Then I thought IP logger.

I will dig into it in a minute.

I think his school is blocking HF site.
He is using unblocksit.es.
Maybe I'm wrong.

Same, phishing was my first guess.

Other members beware, do not click his links.

Yes it automatically roots your ip and steals all of your passwords.
It have infected your cpu and ram so changing pass doesnt help.

Shanks - January 27, 2015, 1:46 am

unblocksit.es Is a way to access blocked sites not a phishing link, google.

Larry David - January 27, 2015, 6:50 am

"unblocksites.es" is a proxy site since my vpn is blocked on HF.

Obelixus - January 28, 2015, 6:11 am

Looks like a legit report. Hope it gets resolved.

Gul19 - January 28, 2015, 11:45 am

who does not get angry over 500\$? lol

Hydraulic - January 28, 2015, 11:52 am

All the drama in this thread.

Hope everything gets resolved.

Morgan Stanley - January 28, 2015, 2:09 pm

I've been reading about this source a lot lately, keep in mind I don't code C++ but according to a few people not affiliated with the product or a competing product, it seems as though its missing a rootkit.

If anything, false advertising to a very high degree.

It's a shame, I really trusted this product and was going to purchase it myself.

Larry David - January 28, 2015, 4:16 pm

Oh ya and for the other 12 year old fags saying im a multi-accounter, youre fuckin retarded. I posted convo of my partner with _Stoner, does not mean were the same person. But what else should I expect from HF right?

"this guy has trophies and ub3r ouuuuuuhhh"

go ahead and buy loadhttp from _Stoner and then if you havent got fucked enough go buy loads from Bull the russian underground hacker .

iThinkBinary - February 15, 2015, 5:03 am

Not sure why but quite some threads end up being flame fest lately, hope this gets resolved
