Thread: [Hyperlink Group Userbar](#)

Reborn Angel - January 27, 2015, 11:04 pm

I think this would be a nice small feature to add that wouldnt take much time!

thanks Japanese for not accepting me using him for example

It would be sick if you could click the user bar to be sent to the groups official thread! :D

Opinions? ?

F.A.Q:

Q:What makes a group thread official?

A: This is what I mean, the thread for recruiting, discussing etc. Most groups have a main thread for their group.

This has been denied several times. One issue is that this would add a lot more links to the page, something Omni is avoiding because it increases page load time and hurts SEO. The second problem is that groups make new threads all the time and it'd be a serious hassle for Omni to have to change the link frequently.

Here are a few threads that I was able to quickly find you may want to read:

[Group Userbars to Link to Respective Group SFs](#) by [Effexion](#)

[Group userbar links.](#) by [Trukfit](#)
