Thread: [\[Free\] Password List - 1,493,677,782 words - 15GB](#)

Lis?hén - January 28, 2015, 9:35 am

Hey !

I just found an awesome password list containing 1,493,677,782 words !
So I just decided to share it with HF community.

Here is the link : <https://crackstation.net/buy-crackstation-wordlist-password-cracking-dictionary.htm>

It is totally free, but you can donate to his creator if you want !

This is not mine, this is just a share !

and I think cracking with such a big list isn't that good...

No problem ^^ There a second list with the password the most used by humans (Doesnt mean that the other is used by Alien *-*), it is less hig and certainly more efficient(I mean quick) ;)

JamesHen - January 29, 2015, 12:03 am

thanks for this!

has the list been checked for duplicates?

Coffee™ - January 29, 2015, 12:04 am

this, makes my wifi cracking atleast 400% easier if not more. Thanks op

Oh well this is kinda public already
Crackstation cant crack 50% of the MD5 hashes

Would be nice if you had got the list of "HashKiller"

Mmh, I think, if you can use 15Vps, and you cut the wordlist in 15part, it can be really efficient.

That is just a theory, I never tried with 15Servers ^^

MASSIVE.

I downloaded the smaller one tho , 15 gb is just madness.

?
