FRANKIE - January 28, 2015, 12:42 pm

What is it?

What does it do?

Copies these files and more to the USB that is plugged into whatever computer you are using it on.

Hey I would kill to get this! Thanks in advance OP!

"Hello World" - January 28, 2015, 2:37 pm

Nice GFX and all but auto runs don't work past windows 7 and up. How would we use this?

FRANKIE - January 28, 2015, 2:47 pm

You would have to manually run the program. I know it might seem like a lot of work but the program itself still works.

Ta-kun - January 28, 2015, 2:56 pm

Got this! Damn, good except for Microsofts restriction of AutoRun.

xD

Sry for being a noob, I am just not familiar with the term "USB Stealer"

FRANKIE - January 28, 2015, 7:11 pm

Pardon my absence in answering these questions.

All versions: I have only ever used this on XP / Windows 7. I am sure Win8 Works as well though.

Santacl4ws - January 30, 2015, 1:03 pm

Could i maybe get a copy of this program?
i know i don't post much i'm moor of a lurker.

Nightfalll - January 30, 2015, 3:22 pm

Hey! Can you please send me a copy? I need 25 posts to send PM's so I can't send you one :x
Also, how does this work exactly? I had this idea a while back but I never got into it that much.

How did you bypass the "auto-run" notification? I know that if you connect a USB to a windows computer then it automatically looks for a registered driver in Microsoft's servers and runs it, but I don't think you've registered a program that copies the files over... Have you?

I'm assuming the actual copying of the files is also done by just a batch file?

Also - how would you go around decrypting the passwords saved (in specific) in the Firefox "profile" that's registered on the computer? Aren't they encrypted via some constant variant value that runs on Windows that's unique per PC?

Thanks in advance! :)

You have five posts. I will share this with you as soon as you have reached the minimum requirement number of posts in order to be able to send me a personal message first asking for this.

Deidas - February 8, 2015, 9:01 am

Please send this to me! Thanks Frankie.

FRANKIE - February 8, 2015, 9:31 am

It clearly states that a PM to me is the only way to get it. Thank you.

Chumlee - February 8, 2015, 5:32 pm

The least you could have done was sent me a personal message to clear things up. If you must know, I have had this program sitting on a USB drive in my drawer for over two years now. There has been multiple threads posting about this. I have not claimed this as my own program nor have I claim to have coded it or been the original provider in any way shape or form. I am simply sharing it with the forum.

Leeched Post

Leeching is when information is taken from one place and posted somewhere else without giving any credit. Threads or posts where the user does not credit the material copied from either the site itself or elsewhere on the Internet will have their thread(s) removed and their account possibly closed.

please remove.

Anyone else who wants this please PM me. Thank you!

So be it.

I don't expect anyone else to PM me and ask me about this because apparently I am at fault for not grave digging and finding the 'original" owner of this program.

It has been sitting on a USB in my closet FOR OVER 2 YEARS now.
