Hello,

We are still seeing many posts asking where is my pay. Please all use a calendar which may be helpful to you in calculating when your payment will arrive.

Please remember that there are 5 business days in a week. Audit can take 30+ business days at the moment and pay is dispatched 5-7 days after that.

So, in short, what this means is that 30 business days is 6 weeks on a calendar. Add 5-7 days after this, it makes it 7 1/2 weeks approximately when your pay will arrive.

Here is an example of a post earlier: "where is my pay I requested May 5th and it's been over a month". Actually, with a May 5th request, 30 business days is June 16th. Add 5-7 business days after this; is June 25th (approximately).

Today is only June 2nd, so it hasn't even been a month. The post is incorrectly calculated.

Although pays are taking longer at the moment, we should see improvement in the next few days as per admin from the pay department expansion, however it is important to note that Gaga is paying, alive and well; and everyone will receive their pay.

I hope that this helps everyone calculate their pays vs. posting where it hasn't even been a month. Happy clicking to all, and please all remember to post pay proofs. Unfortunately, not everyone is posting proofs still.

It's just tampering, seriously, even a 5-year old can do it.
