Thread: [Beware of Pimp/Haze/Brakam + northern lights cheat](#)

SPLUXOR - January 29, 2015, 10:46 am

Some time ago I sent Pimp my cheat, then he got banned on interwebz and disappeared, I heard that he sold an moderators cheat, so I was skeptic as I sent him my very own, also.

So I started investigating, turns out he sold my too.

Everyone who bought a cheat named 'northern lights' got scammed from him.

I recommend withdrawing, and not having anything more to deal with him.

Afaik, this isn't his first time doing so, he did the same to Atex, a moderator of interwebz.cc, that's why he got banned first time on interwebz.

Heres the cheat .dll (packed with upx): mega. co.

Cheat is utter shit, it was in development stage at that moment, hence why he didn't tell to anyone about CTRL + NUMPAD * -> unload; chams can't be disabled.

Just want to warn you all, that he can and will leak almost everything you send to him ;-)

Greetz, ir0n

I vouch for ir0n, I know this is all truth and pimp aka Haze has been reselling this cheat, unfortunately.

TheDFighter - January 29, 2015, 10:53 am
