Thread: [Looking for a skilled hacker to help me out](#)

**cachedout** - January 29, 2015, 10:57 pm

Over the past few months i have been studying the shit out of everything hacking (not a whole lot of coding, currently learning kali linux) and im extremely interested and desperate for any skilled hacker to help me out and share bits of their knowledge with me. I take this pretty seriously and i only have two main goals/milestones that i want to achieve:

- Make Money (any method) (low-average amount for the hrs spent)

- Keep Safe (being completely anonymous)

programs/tools i have:

- mIRC

- a paid working crypter

- Kali linux in VirtualBox

- VPN

- Proxy on my web browser

About Me:

Im quite a fast learner, especially with something i have great interest in, i devote almost all my spare hours when im not doing day to day activities to learning, gaining knowledge and improving my skills. I dont consider myself annoying, im not going to message you about every tiny problem i run into, spam you and just overall be annoying. I dont ask stupid questions e.g. hey br0 so uhh how d0 i DDoS!!!! :DD.

Lastly, i mainly use skype for contacting people however im probably going to get xmpp soon.

(dont ask me to PM you on here as i only made this acc a month or two ago so i do not have enough posts, simply PM me your xmpp, skype or something OR reply with an account i can contact you on as well as what its for skype, xmpp etc.)

Thanks

Are you able to be more specific? Due to your thread having lack of detailed information it's hard for me to point you into the correct direction.

Making money has many methods.. Im no pro but E-Whoring is easy to make a quick buck.

**Troja?Hors?** - January 30, 2015, 7:30 am

Looking for a skilled hacker in the beginners hacking section, mhmm mkay.

TH.

**jay1994** - January 30, 2015, 7:51 am

you can always message me on skype! :D

i dont mind helping you out

**cachedout** - January 30, 2015, 10:54 am

Trojan Horse are you trying to say the only people that are active in the beginner section are beginners? Who do you think answers people questions other beginners LOL

to be more specific i guess i could say im not looking for white hat only methods or something. im not going to shy away from any type of method unless the hours to money ratio is terrible or it is in no way a consistent method.

Money making methods

=====

Taking money the black hat method isn't allowed on this forum i dont think.

Things like:

Stealing bank accounts

Breaking into paypals and stealing all their money

using RATS to get bank accounts ect..

White hat methods however are fine i guess >.<

Things like:

E-Whoring

Developing a program worth buying (FUD Crypter with many methods and features, RAT client also with many features and being very or quite stable)

Selling an E-Book

These are only a few methods but i hope this helps :)

My man, ewhoring is not white hat.

OP what you're trying to do is find an experienced skype "hacking" buddy that is going to guide you in the right direction, whenever you are struggling with something. What you need to do is gain people's trust. Then people will actually want to help you with whatever it is.
