Why would that matter? No one will buy a shitty e-book if it doesn't have vouches.

Yes. That doesn't matter how much it costs, no one will buy an e-book without vouches.

I just purchased it and I don't think this will work for my trade banned steam account.

But at least there is some tips and tricks in the e-book.

When u do everything like in the guide you have the chance to get unbanned from "Community/Buying/Trade". This does not include VAC.

I tried this many times with other accounts, i got items on my second account and send them to my main. My second got banned, after i typed to the support with this method i got unbanned.

I will thinking to give vouches copies out.

Some tried this with a banned acc. They got unbanned others not.

if youre already banned, then you have a chance of 50/50. This guide costs only 2\$, so if youre unlucky you will have the guide for your next acc.

Remember with a banned account youre on the last step.

I would prefer it before u get banned.

You have a high chance to get unbanned when u buy this before.

If youre already banned your chance to get unbanned will be 50/50. Many people bought this now after they got banned. Some are unbanned others not.

The support wants sometimes Keys, proofs and some more things if youre already banned.

But when u do this before you get banned, then they already have proofs, you will understand what i mean when you buy it.
