Thread: [Botkill by Bastian](#)

Bastian - February 1, 2015, 2:55 am

Hello Guys,

today im gonna releasing "Botkill" which stops bots from start up in your system.

```
Code Imports System.Collections.Generic
Imports System.Linq
Imports System.Text
Imports System.Threading.Tasks
Imports Microsoft.Win32
```

```
Namespace Bastian bot_killer
```

```
Class Program
```

```
Private Shared Sub Main(args As String())
```

```
Dim RegKey As RegistryKey =
```

```
Registry.CurrentUser.OpenSubKey("Software\Microsoft\Windows\CurrentVersion\Run", True)
```

```
Console.WriteLine("Welcome to Bastians Botkill System")
```

```
Console.WriteLine("Enter yes to stop bots from start up")
```

```
Dim conline As String = (Console.ReadLine().ToLower())
```

```
If conline <> "yes" Then
```

```
Try
```

```
Console.WriteLine("You did not enter yes, Botkill is now exiting")
```

```
Return
```

```
Catch e As Exception
```

```
Console.WriteLine("Error: ", e)
```

```
Return
```

```
End Try
```

```
ElseIf conline = "yes" Then
```

```
For i As Integer = 0 To RegKey.GetValueNames().Length - 1
```

```
'try
```

```
Try
```

```
Console.WriteLine("Do you want to kill ", RegKey.GetValueNames()(i).ToString(), "?",
```

```
Environment.NewLine, "Enter yes to delete and anything else to skip")
```

```
Dim conline2 As String = (Console.ReadLine().ToLower())
```

```
'Regkey = current\version\run (a start up key)
```

```
'Over write it
```

```
If conline2 = "yes" Then
```

```
'Regkey setvalue = int (converting int before applying)
```

```
RegKey.SetValue(RegKey.GetValueNames()(i).ToString(), "")
```

```
'Sucess
```

```
Console.WriteLine(RegKey.GetValueNames()(i).ToString(), " was succefully killed")
```

```
Console.WriteLine("If you enjoyed please vouch in Bastians Thread on HackForums.net")
```

```
Else
```

```
'else
```

```
'Pop up a messagebox
Console.WriteLine(RegKey.GetValueNames()(i).ToString(), "was not killed, usually you have to
manually remove this.")
End If
Catch e As Exception
'Catch
Console.WriteLine("Error: ", e)
Return
End Try
Next
End If

End Sub
End Class
End Namespace
King regards,
~ Bastian.
```

Why should I just delete all my autoruns?

- 1) There is more than one way to add an startup.
- 2) Most software which is in autostart is meant to start on the windows start

Cornflower Blue ???-? — February 1, 2015, 7:17 am

I just read this "Poll: Did this worked for you?" and insta-clicked on no.

LijpeMD - February 1, 2015, 7:58 am

```
If conline <> "yes" Then
Try
Console.WriteLine("You did not enter yes, Botkill is now exiting")
Return
Catch e As Exception
Console.WriteLine("Error: ", e)
Return
End Try
```

Huh, even more we have in common...

GenericSkid - February 1, 2015, 9:57 am

When you skid from LF you've done nothing but proven how retarded you are.

LF/thread-443703

Wow. Your Posts are even better omfg :o

Kill?Muvz - February 1, 2015, 12:06 pm

This is not really a botkill. Any decent bot will install itself somewhere else or would at least have startup "persistence"

LijpeMD - *February 1, 2015, 12:11 pm*

Bullshit, instead of this you can just open up msconfig lol.

And some viruses bind themselves to something else.

CrackMe - *February 1, 2015, 9:11 pm*

This looks more like a system kill instead of the real use.
