Do i really need to write a paragraph on what this does?

Parses the download link from the page source code.

allowing you to paste it into a browser and download the video

VPORN

Code Public Sub download_vporn(ByVal url As String)

Dim request As System.Net.HttpWebRequest = System.Net.HttpWebRequest.Create(url) :

request.Proxy = Nothing

System.Text.RegularExpressions.Regex("<script type=""text/javascript"">(.*?)</script>",

System.Text.RegularExpressions.RegexOptions.IgnoreCase Or

System.Text.RegularExpressions.RegexOptions.Singleline)).Matches(sr.ReadToEnd()),

System.Text.RegularExpressions.MatchCollection)(2).Groups(1).Value, String)

TextBox2.Text = ddf

End SubXvideos

Code Public Sub download_Xvideos(ByVal url As String) 'working as of 20/05/2014... downloads website text, finds the 'flashvars' parses it to get direct download link

Dim request As System.Net.HttpWebRequest = System.Net.HttpWebRequest.Create(url) :

request.Proxy = Nothing

Downloader(System.Web.HttpUtility.UrlDecode(DirectCast((New

Why cant people just save the video from the browser instead of getting a URL from the browser, opening the program, pasting the URL, etc. Also, who downloads porn these days, except pedophiles and people with weird and illegal fetishes like necrophilia.

From what I could understand you give a video URL and it extracts the MP4 video file from it and downloads it.

Well can't say i disagree, but what you can do, is to add a simple clipboard monitor which copies the original URL, and sets the clipboard to the direct .MP4 link,

Other than that, this is pretty useless, thought it might help people understanding basic regex.

Lol, there are better sites to understand regex than these ones xD
