It's easy to achieve few \$/day but you ain't gonna find autopilot method.

1. You can try all methods submitted in past months that were greatly recognized as working, real business model monetizing techniques:

Most are listed here:

<https://hackforums.net/showthread.php?tid=4556922>

2. You can easily convert your free time into money.

Just signup to

<http://www.Microworkers.com>

<http://www.Minijobz.com>

<http://www.jobboy.com>

or some other minijobs website:

<http://www.ranker.com/list/best-microworkers-alternatives/gary-bisha>

3. You have certain skills/knowledge:

Make a service.

For example you know good sites that allows you to submit links that are "DOFOLLOW", sell it as SEO service.

Offer it at:

<http://www.Fiverr.com>

Fiverr is bit competitive and overcrowded with offers so copy/paste them also to:

Fiverr clones that brings extra sales:

<http://www.seoclerks.com> (sales are rolling in even faster then on Fiverr)

<http://www.fourerr.com> (makes few sales too)

And don't forget good old

<http://www.freelancer.com>

Check jobs out there or offer your services.

Thanks for the collection of links mate

These kind of jobs help people retain the idea that making money online is an actual job, not just free money

Eye opener for noobs that think they can make billion \$ without any special skills, knowledge or experience.

If you know almost nothing, hard work is only way to go and you'll learn new things on the way.

Even experienced people need to put awful lot of effort to make any reasonable income.

This is a good list. Will try this on my spare time.

Thanks.
