Thread: [\[Whitehats\]](#) [\[Job listings\]](#) [Security testing, Stress testing service](#)

Zesto - February 2, 2015, 11:47 am

Security testing

- I will have one of my guys try to hack into your computer and see how safe your computer system is and tell you any loop holes or back doors he finds to your system.

- You may have to download a file for him or her because it may come loaded with a virus to see if your computer notices it and alerts you to the danger but the virus will not damage your computer.

- Services priced at

1.00 - for basic testing

2.00 - for advanced testing

5.00 - for three testing

Stress testing

- You pick how many computers you want pinging you to see if your internet can handle it

- We only stress test for 10 min because we don't want this to be used as a dos service

-Services priced at

2.00 - Base fee

0.10 - per machine pinging you

0.50 - for a high speed internet connection pinging you

Computer support

- We will help you with any problems you have using skype

- We can help you with web cam mic anything we can help you with xbox playstation anything

- We also help with any other setup or software / hardware issue you may have

Services priced at

0.50 - Base fee

1.00 - Hardware / Software PC

2.00 - Hardware (Xbox)

1.75 - Hardware (Playstation)

1.20 - Older Systems

1.00 - Software (Xbox / Playstation)

Tools

- We can sell tools to you if you ask for them we will make them

Services priced at

- 1.00 - Base fee
- 0.50 - If we have to tool in stock
- 1.00 - To make basic tool
- 2.00 - To make advanced tool
- 5.00 - If completely original tool
- 3.00 - For rights to the tool (Could be more if its a complex tool)

(We don't have to sell you the right and we can still sell the item if we sell you the rights)

This is the most stupidest service I have witnessed in my life.

So you are going to run your RAT which you bought off this forum to test the security of someones computer? Hahah, this is great.

You should open a service for kids with down-syndrome to test their retard level by asking them for their bank details, to test their bank security. Then charge them a fee.

Umm no...

Clearly you dont get the point
