Thread: [Traits/Bio - READ!](#)

**Accessory** - February 3, 2015, 5:05 pm

So i was thinking it would be a great idea to put like some sort of bio type thing on everyones profile where they could put there traits (ex. Java Programmer, Gamer, GFX designer, etc) this could help identify people around the community and also be easier if someone is looking for someone to help them out. This would have a lot of benefits.

LOL you are such a 2014 member. You meet all the requirements..

1. Illogical
2. easily offended
3. creating threads on how to "be hq".

next you'll be changing your usertitle to "businessman" and selling ebooks on how to get nudes from girls you've never talked to. All I did was inform you that this suggestion has been denied in the past and I even provided a suitable alternative to display relevant information so either accept it or taste my ub3r cock.

Here is Omniscient's response to this suggestion:

(Feb 8, 2014 03:39 PM)Omniscient Wrote: [\[CITE\]](#) Would likely be used to troll. You can do that anyways in your sig if it's that important to you.

With that being said, it is likely that this will not be added to the site. If he changes his mind, he will open the thread and make a response to it.
