Hi guys. I made a FB group to reach mass amount of people with my niche. It's in the working but now I have a group full of horny men and I'm sure you guys would like to get in on it. If you just join the group and post a pic like Add me I'm 18 blahblahblah and you might get a few customers.

Great idea.

More people should be getting in on this.

This should bring in unsaturated traffic actually great idea I might join it on my ewhore in future, more group's should be made though so the traffic doesn't become saturated ?

Well if you join it and share the group we can all profit off it. These are all clearly desperate people and you can earn off that so go go go people!

It's easy enough to do. It's a ewhores dream since you can be as "dirty" as you like because there is no rules in the group. Also, I am admin but that isn't my real details or real name.

Just wondering, did a lot of people profit off this? I've seen a lot of people offering cams for money now but I don't know if it helped anyone. Please post if it did.

Hello! I'm bringing this back up because I need some "girls" in the group. It's a sausage fest so basically you guys have a big chance from earning from it. Join the group and I will accept you asap it has over 700 members.

Whoever Erin Lampe is in that group, he's lucky with that interest from people considering how saturated the girl he use is. :P And Jessica Jayne. Oh god I'm having a blast spotting that one same saturated girl under several names. XD

This is awesome I have been using other Facebook groups to do this but your one seems to be working really well.

You're welcome guys. I don't use it for ewhoring and pretty girls in the group helps promote my group so whatever. Try to invite people to the group if you want to help me out. Also, if you share this group all the guys on your list are going to know you are down and dirty so they will try get pics.
