I'd recommend vDos Stresser. I'd rather buy a costly one than a cheap one that's just released.

Check the market place. From my experiences with some friends, vDos is very good and I would recommend it.

Just be careful which one you buy a lot of people that owns stressers are only up for no more than 4 months and but there are some here that has been here for a couple of years just do some research about them

If you gonna go on a stresser which I suggest you shouldn't do, but then I would recommend V-Dos.

Just buy a vps off me.

Unlimited attack time and such.

The price per vps is 15-20 dollars.
