I would like to apply for this group , i can be more active here and help the group to shine more on the forum

The All Seeing Eye - February 4, 2015, 1:35 pm

Let's take a look at this.

- We will start by analyze it:

- 00 is used 3 times (x3)
- 50 is used 2 times (x2)
- 23 is used 1 time (x1)
- 07 is used 1 time (x1)

The question here is, why would somebody put an 07 in seven, when you just can type "7".
This means we are dealing with some sort of timer, clock or date.

I will reveal more information soon.

We start with this.

00

00

07

23

50

50

00

We can take out the 00's because the value is 0. Now we get this:

07

23

50

50

We have 50 twice so we will add them together to get 100.

07
23
100

We can take out the 0 before 7 because the value is the same.

7
23
100

23 and 7 fit together to get 30.

We now have this:

30
100

The total number of 0's is four.

There are four letters in the word "zero".

"zero" represents the number 0, and also the group; "Zero".

The o in Zer[o] looks like a zero.

If we add the value of zer[o] to the four 0's in the equation, we get five 0's total.

We are now at

0
0
0
0
0
0

If we add all of these numbers up, we get 0.

The answer to the problem is zero! You should accept me because I'm super active in the sub-forums and I love sharing funny gifs and stuff.

Code p=22558 So that's what I came up with when I took the following code:

Code 00 00 07 23 50 50 00

And put it through a CNVRDSRV program which computes estimates of survival & capture probability for transient model capture-recapture data, and it came out with the aforementioned result of:

Code p=22558

At least from what I could tell, this was the start of a ASCII input file, with also the starting header of

a CNVRDSRV input file.

That's what I garnered anyways, sorry if I'm off.

You sparked the idea in my head! No, this is slightly wrong.

After you said
"23 and 7 fit together to get 30.
We now have this:

30
100

The total number of 0's is four."
You fucked up.

23 and 7 need to be subtracted.
 $23 - 7 =$ https://www.youtube.com/watch?v=Wl2JzONV_ks

So if you have https://www.youtube.com/watch?v=Wl2JzONV_ks , you can divide it by 2 and you get 10.5 .

Take 10.5 and add 0.5 and you get 11.

Now if you have 11 and add a 9 to the front you get 911. Fishy right?

Now if you dial 911 in your phone and call it, it takes you to PizzaHut.

PizzaHut has 2 z's and one i's.. That's 3 characters.

Illuminati has 3 sides to the triangle.

[This link](#) is where all my products and income come from, I also buy and trade stock. Occasionally I buy online accounts and turn them around for profit (but this is rarity).

Why I want to join: I would like to join Zero because it seems like they have so many large giveaways. I was in the group but got kicked because a lot of members disliked me. I want another chance and it seems I am on of the very few people to apply.

Why do you want to join?

I only see a few select members with your user-bar representing the group. All of which are of quality and prestige and I feel like I have a lot to offer. I do not think you would be disappointed if you were to accept me into the group.

What sets me apart?

I feel like I carry myself in a professional & formal manor. Sure I let go once and a while just like any other human being but I know the time and place. Anything I do I strive to put the utmost amount of quality and pride in.

Personal Life

Very calm & easy going guy. I love to laugh and have a good time. Probably the biggest geek on the forum when it comes to old cartoons and comics. Musically I love 70's soft rock and anything from the 20's - 30's era.

Anything Else?

Nothing off the top of my head but if you need anything or have any further questions please feel free to PM me. Thanks :)

Rek'Sai's Application

Why did i come to HF?: I came to Hackforums so i can learn alot of new thing's and upgrade in graphics i learned alot coming to HF but I had to quit graphic's since i have alot of better thing's to do.

How old am I? 18

Why do i want to join?: I would like to join Zero because it looks like a nice and enjoyable group to be in. I would also like it to be my first group to ever join on Hackforums so i can meet alot of nice and HQ People.

What's My main goal for the group and HF?: One of my main goals for the group and HF is business im a business man i like to find things that i think is worth the money to invest in and make tons of cash.

What do i want to see if Zero if accepted?: I would like to see a ton of HQ Member's helping out new members if they need it so they can enjoy this forum as much as we do.

Side note: Hopefully you guy's choose to accept me i wont let the group down.

The only historical significance is that U.S. President George H. W. Bush sent 28,000 troops into the Somalia Civil War. I think hex code might make a little more sense, but neither really make much sense.

I post a lot and I'm pretty active. I'm 17, my name is Will and I'm from the U.S. I live in Illinois so I'm in the Central Timezone.

Zero!

Hello, my name is Of Mice and Men aka, Kyle. Feel free to call me whatever. I am 17 years old and turn 18 in 17 days.

00

My expertise

Right now I am an active photographer. I have been snapping shots ever since I can remember, even with one of those disposable cameras from Wal-mart. I am enrolled in a college-level photography class and am enjoying every part of it. I am planning on going to college to pursue my knowledge in photography. Also I have sold a couple pieces of my photography to local businesses in my area. Every week I am always out taking shots of my city and some of the parks around my area. I also have a couple tutorials along with a photography critique thread here on Hack Forums that I help fellow photographers here with.

Here is a picture of the canvas that I sold.

<https://gyazo.com/2a85af901f632b62c7bc8eb98d0345f1>

At my highschool I am enrolled in a computer programming class learning the basics of programming in python and hoping to broaden my knowledge in that as well.

In addition, I have a good amount of knowledge in Adobe Illustrator and Adobe Lighroom for photo editing.

So what that means is that $00 + 00 + 07 + 23$ is 30
 $50+50+00$ is 100
 $100-80$ is $20+30$ is 50
 $50/23+(7-5)$ is 2
 $2 + 7$ is 9
 $9/3$ is 3
a triangle has 3 sides
Half life 3 confirmed?
No, that can't be it.
If a triangle has 3 sides, but the group is named zero.
Then $3 + 0 = 3$
What has 3 sides?
A triangle
What I have come to a conclusion
is that
Zero $\Leftrightarrow$ Illuminati
Not only that
Zero is also located 100 miles east from my house
and my house is my house
because I am brown
Brown?
Brown?
You know who else are brown? Arabians.

You know what else is 100 miles away from my house? Saudi Arabia.
Saudi Arabia is the home for ISIS

Zero > Illuminati > Isis > Zero

Confirmed op. Thx 4 reading.

TL;DR

Zero = ISIS = ILLUMINATI

& half life 3 is confirmed once again.
