Thread: [\[Free\] Minecraft Name Checker](#)

Frozen Firefly - February 4, 2015, 7:56 pm

I made this out of boredom. I'm not some experienced coder or anything. Just load up a list of names and it will attempt to check them. You can then save any available names it finds.

Note: This tool is not 100% accurate, as it uses the old Mojang name checking URL.

If you want anything added, then let me know.

[Virus Scan](#)

[Latest Download \(MediaFire\)](#)

PrivateDonut - February 4, 2015, 8:10 pm

I'm sure someone can find this quite useful, thank you for the release! You probably aren't getting a lot of reply's on your thread, because people just like to download and go....

MarSy - February 4, 2015, 8:10 pm

Like how this user said ^^ make it like they got to post here or PM you for the password of the file ;) thank you for this

Frozen Firefly - February 4, 2015, 8:19 pm

I feel as this program is too simple to require a password. Just a little something I thought people might be looking for.

Thanks for the awesome replies though. :)

Pury - February 4, 2015, 8:19 pm

After its done checking, how do you know which ones are available? it just says how many are available

G59 - February 4, 2015, 8:22 pm

Wow, this works great. I appreciate the time you took to make this; well done.

The Red Wedding - February 4, 2015, 8:24 pm

Very nice program! I used this and it works great! Well done.

G59 - February 4, 2015, 8:43 pm

There is 8751 "3 character" usernames left for grabs.

Mangekyo - February 4, 2015, 8:46 pm

(Feb 4, 2015 09:43 PM)Mac Sauce Wrote: [\[CITE\]](#) There is 8751 "3 character" usernames left for grabs.

Most of them probably include an underscore (if I'm not mistake).

G59 - February 4, 2015, 9:05 pm

(Feb 4, 2015 09:46 PM)Erikpie Wrote: [\[CITE\]](#) Most of them probably include an underscore (if I'm not mistake).

None of them include an underscore. They include numbers and letters.

Plague - February 5, 2015, 9:24 am

Thanks man, Nice share.

Working good for me.

Maybe add an option to copy all the usernames instead of just one?

Frozen Firefly - February 5, 2015, 11:46 am

I'll add the ability to save to a text file when I'm home.

Josh? - February 5, 2015, 2:35 pm

Which is the old name checking URL that you reference in the OP?

Frozen Firefly - February 5, 2015, 4:48 pm

The program has been updated with a save feature. Let me know if anything is wrong!

(Feb 5, 2015 03:35 PM)Josh? Wrote: [\[CITE\]](#) Which is the old name checking URL that you reference in the OP?

It uses the "haspaid" URL. You can find it easily.

?Arrow-? - February 6, 2015, 12:03 am

Vouch for this it is not a virus. Since the recent MC username changes I was able to grab the username Hurtful because of the tool. I deeply recommend it you should hurry up and get a OG username while you can.

Josh? - February 6, 2015, 12:53 am

haspaid is not reliable in the slightest.

Check one of my recent posts in this section, and at least add the option to change between the different methods.

Mine is case sensitive. The other API linked in the post I referred to is the proper working one ?

NothingIllegal - March 7, 2015, 1:40 am

Thanks a ton for this, mate! (35 Characters?)

Firefly969 - March 8, 2015, 3:47 pm

for me personally this may not be used very often but very nice and well made. good job

Quhzey - March 27, 2015, 9:14 pm

This program is actually pretty cool, good job on it.

oscast - March 28, 2015, 7:31 pm

Nice job! Very nice x3Very nice x3Very nice x3Very nice x3Very nice x3

Niccolò Machiavelli - March 29, 2015, 1:22 pm

Nice bro, saves the hassle of checking each name individually

juliando - March 30, 2015, 10:58 am

Very nice program !

Thank you for the release!

Villezzai - April 5, 2015, 1:51 am

This tool is really useful, thanks! ?

Charizarde - June 9, 2015, 3:58 pm

The file scan is now 1/57 for some reason :/

n i g h t - June 9, 2015, 6:30 pm

Awesome program, works great! Bump this thread and thanks for making it.

??????????? - June 10, 2015, 7:57 pm

Seems nice. Better than mass checking using NameMC.

katealive - June 12, 2015, 7:54 pm

Thanks for this! Will try to test this out later.
