Could you please post some pictures and an antivirus scan in the OP? That way you'll get a lot more attention, and people wouldn't hesitate downloading this YT viewer bot. Thanks a lot!

Ole™ - February 6, 2015, 5:45 am

Good i recive the pms and you guys will get the link as soon :)

Can you provide a screenshot? Based on your rep, you are a very sketchy user.

As Promised, I'd leave a review.. So here it is.

First initial impression...Chrome called it a virus..Time for sandbox

virus scan:

<https://www.virustotal.com/en/file/0c599991180af9b504d190ab9d0a1c0519d21ab9ca2323c5499dcd207c7432f1/analysis/1423411168/>

Virus total on Virustotal : 0

RAR has Password: Yes..

Open Bot, set link....goes super slow, and does NOTHING. Upon opening the program it says stuff like "this program is illegal to use. want to continue?" then after running the program it says " some extra files were edited during your process, do you want to push them to the archive?"

Overall 3/10, good lay out, seems interesting but all in all it doesn't do anything.

Virus scanning computer as well :) (and DC rat remover)

I'm hoping im wrong OP, but I'm not seeing the program work
